KeraPlex Lash Lift Aftercare

- **Keep them dry:** As KLL involves applying specialized solutions to a delicate area, you should make sure to keep your eyelashes dry for at least 24 to 48 hours after the procedure. Avoiding moisture will help to ensure that the curl settles in properly. This means avoiding steam as well as getting your lashes wet in the shower.
- **No pillow cuddling:** Do not let anything touch your eyelashes for at least 48 hours. Avoid anything that could lead to accidental tears or risk your lashes in any way. We suggest you sleep on your back for a couple of days to prevent your eyelashes from getting scrunched.
- **Using mascara:** While there is no need to use mascara after KLL to look stunning, you might still want to wear mascara to give an added touch to your makeup. If you plan to do so, please wait 48 hours after of the procedure.
- **Condition your eyelashes:** Any treated hair needs to be conditioned regularly to maintain the results. We can suggest nourishing lash products to protect and moisturize your eyelashes after the KeraPlex lash lift procedure.
